## Hosting History

DomainTools tracks changes to a domain name's IP address, name server and registrar. These events can be useful signals that may indicate more macro events, including: domain name sales, transfers or deletions; taking a site live with new content; or a change in registration or hosting profile.

# Screenshot History

DomainTools captures snapshots of website homepages on regular intervals. This content is useful for researchers to understand how a domain was used at various points in time. Due to the relatively high storage costs of screenshot data, the coverage of screenshot histories is in most cases not as thorough as Whois or hosting data, and this is especially true for dates early in a domain's history.

DomainTools has 6 records collected between Dec 22, 2005 and Jul 1, 2008.
